### WRITING

#### Audio-books

Books always were popular in our society. They are a part of our history. We use them for studying or entertainment. A lot of people really enjoying reading but sometimes they just can't read them for some reasons. For example, when we are driving a car it is illegal to read, because you can get in a car crash. That is why people invented audio-books. Audio-books are really easy to use. All you need is just download the book you want to listen to and press the button "play"!

Audio-books have some really good pluses. Like you can download any book you want and it is free. Some old people having have ~~problems~~ problems with reading little letters in the books. So audio-books are really helpful for them. Now you can enjoy

3

your favorite book while driving  
or cooking.

But there are some minuses of  
audio-books. In places where <sup>there</sup> are a lot  
of people you have to listen <sup>to</sup> audio-books  
in earphones, so you wouldn't bother  
other people. And it could be bad  
for your ears. If you stop reading  
books by yourself you may lose  
your skills in reading.

Our world is always developing and  
new inventions like audio-books are  
appearing to make our lives easier.
